PROFILE

Earned my Honours Bachelor's in SETU Carlow. Experience coding in C++, C#, Python, JavaScript, HTML and CSS. Worked as a Test Engineer for UNUM inside an agile team environment, which required tools like Vtest, Postman and Selenium to complete unit and API testing. Worked in teams remotely and in-person to complete multiple projects and games. Used cloud services like Azure and AWS to create game server databases for my projects. Enjoy coding games and programming a wide range of software in my spare time. Have experience creating online games and developing network systems for games.

TECHNICAL SKILLS

- **Programming Language:** C, C++, C#, JavaScript, Python, CSS, HTML, Assembly, GDScript
- **Experience with Software:** Unity, Godot, Jupyter, GitHub, Codeberg, Git, Git Bash, GitHub, SFML, Azure, AWS, Docker, Selenium, Flask, Vitest, Playwright, Excel, Rally, Blender, Postman, XCode
- **Additional Experience:** OpenGL, Google Tests, Steamworks, MySQL, Kubernetes, SFML

EDUCATION

Honors Bachelor's in Computer Games Development (Level 8)

Southeast Technological University Carlow

Duration: September 2022 – May 2026
Average GPA (over 4 years): 1.1
Subjects Included: Games Engineering II (82%), Web Development and Databases (83%), Gameplay Programming for Mobile Devices (75%), 2D Game Programming (93%), UI Programming (82%), Game Design (89%), Interaction Design (89%) and more.

PROJECTS + DEVELOPMENT WORK

All of the projects I've created, currently developing and contributed to, can be found on my website. Majority of my projects are related to game development, and each project has different skillsets used.

Project Skills Included: UDP Networking, DigitalOcean, Steamworks, GitHub, GitHub Pages, Codeberg, Itch.io, Godot, Claude, C++, SQL, JavaScript, HTML and CSS.

WORK EXPERIENCE

1. Unum: Test Engineer, Internship

Tasked with verifying bug-free development work prior to release and logging test environments while working in an agile environment. I worked alongside Team Commitments, and my assigned work would have ranged from regression to API testing. Relevant tools used during my time in Unum include Postman, Selenium, Playwright, Vitest, Azure, Excel and Rally for testing, version control and to track assigned workload for upcoming sprints (2 week durations).

I would be assigned a list of points to tests, which were entered in an Excel file to update after testing concluded. This Excel file would act as a reference and also include test case results or any unexpected results / bugs if they are found during testing.
Date Started: February 2025

2. Dublin Airport: Dublin Airport Trainee Consumer Information Centre

Worked closely with airport security, customer support and retail assistance.
Date Started: February 2020

3. Tesco: Part Time Floor Staff

My time in Tesco includes assisting customers, stocking shelves and packing / unpacking deliveries.
Date Started: December 2019

4. Nat Fabrications: Fabrication Assistant

On-Site Assistance and web related work. Participate in jobs where assistance is needed.
Date Started: January 2019 (Occasional Support)

HOBBIES

- Sports: Tennis, Swimming
- Learning and reading.
- Participating in Game Jams.
- Currently developing a game that is to be released to the public in the future. This game is fully coded in Godot with GDScript. More details about this project can be found on the website linked in this CV.

CONTACT DETAILS (ON REQUEST)

- Ross Palmer (Lecturer at SETU Carlow)
